

MedDRA

Supporting Public Health Globally via the Use of Terminology Standards

New Technologies to Report Adverse Drug Reactions

Presenter Disclosures

Brian J. O'Hare

The following personal financial relationships with commercial interests relevant to this presentation existed during the past 12 months:

- I have been employed by Northrop Grumman
- I own stock in Northrop Grumman

MedDRA was developed under the auspices of the International Council for Harmonisation of Technical Requirements for Registration of Pharmaceuticals for Human Use (ICH). The activities of the MedDRA Maintenance and Support Services Organization (MSSO) are overseen by an ICH MedDRA Management Board, which is composed of the six ICH parties (EU, EFPIA, MHLW, JPMA, FDA, PhRMA), the Medicines and Healthcare products Regulatory Agency (MHRA) of the UK, Health Canada, and the WHO (as Observer).

MedDRA

Objectives of this Presentation

Role of MedDRA in supporting public health via use of new technologies to report adverse drug reactions:

- Explain MedDRA
 - What is it?
 - How it is used?
 - Who uses it?
 - Examples of use
- Role of MedDRA to help improve adverse event reporting

MedDRA

Background

MedDRA

What is MedDRA?

Med = Medical

D = Dictionary for

R = Regulatory

A = Activities

Supports public health by facilitating safety monitoring of medicinal products.

MedDRA

MedDRA Definition

MedDRA is a clinically validated international medical terminology used by regulatory authorities and the regulated biopharmaceutical industry. The terminology is used through the entire regulatory process, from pre-marketing to post-marketing, and for data entry, retrieval, evaluation, and presentation.

MedDRA

MedDRA Features

- 76K terms arranged hierarchically
- Classification for a wide range of clinical data
- Available in 11 languages
- Rigorously maintained
- Required component for electronic reporting

MedDRA

Scope of MedDRA

IN

Medical conditions
Indications
Investigations (tests, results)
Medical and surgical procedures
Medical, social, family history
Medication errors
Product quality issues
Device-related issues
Pharmacogenetic terms
Toxicologic issues
Standardized queries

MedDRA

MedDRA Structure

MedDRA Structure (cont)

- [-] SOC Ear and labyrinth disorders
 - [+] HLT Aural disorders NEC
 - [+] HLT Congenital ear disorders (excl deafness)
 - [+] HLT External ear disorders (excl congenital)
 - [+] HLT Hearing disorders
 - [-] HLT Inner ear and VIIIth cranial nerve disorders
 - [+] HLT Inner ear disorders NEC
 - [+] HLT Inner ear infections and inflammations
 - [-] HLT Inner ear signs and symptoms
 - [+] PT Cogan's syndrome
 - [+] PT Motion sickness
 - [+] PT Tinnitus
 - [-] PT Vertigo
 - LLT Acute rotatory vertigo
 - LLT Head revolving around
 - LLT Head revolving round
 - LLT Head spinning
 - LLT Other and unspecified peripheral vertigo
 - LLT Other peripheral vertigo
 - LLT Peripheral vertigo, unspecified
 - LLT Room going round
 - LLT Rotatory vertigo
 - LLT Spinning

MedDRA

Users

MedDRA

Regulatory Use

- True international standard for adverse event (AE) reporting and analysis
- US FDA
 - Not mandated but *de facto* standard in US
 - Used in several FDA databases
- Japanese Ministry of Health, Labour and Welfare
 - Mandatory use in electronic reporting
- European Union
 - Mandatory use in electronic reporting
 - EudraVigilance database
 - Good Pharmacovigilance Practices (GVP) specifically mention MedDRA
- Biopharmaceutical industry

MedDRA

Regulatory Use (cont)

- US FDA databases using MedDRA
 - Center for Drug Evaluation and Research (CDER)
 - FAERS (drugs and biologics)
 - Center for Biologics Evaluation and Research (CBER)
 - VAERS (vaccines)
 - Center for Food Safety and Applied Nutrition
 - CAERS (food, dietary supplements, cosmetics)

Who Else Uses MedDRA?

- Non-ICH regions
- WHO's international drug monitoring center (Uppsala Monitoring Centre)
- Academic researchers
- CDC
- Toxicologists
- Others

More than 4,000 subscribing organizations worldwide in more than 90 countries

How MedDRA is Used

...and by this SOC...

→ **SOC** Ear and labyrinth disorders

- + **HL GT** Aural disorders NEC
- + **HL GT** Congenital ear disorders (excl deafness)
- + **HL GT** External ear disorders (excl congenital)
- + **HL GT** Hearing disorders

...by this HLG...

→ **HL GT** Inner ear and VIIIth cranial nerve disorders

- + **HLT** Inner ear disorders NEC
- + **HLT** Inner ear infections and inflammations

...by this HLT...

→ **HLT** Inner ear signs and symptoms

- + **PT** Cogan's syndrome
- + **PT** Motion sickness
- + **PT** Tinnitus

All of these reports are represented by this PT...

→ **PT** Vertigo

- ... **LLT** Acute rotatory vertigo
- ... **LLT** Head revolving around
- ... **LLT** Head revolving round
- ... **LLT** Head spinning
- ... **LLT** Other and unspecified peripheral vertigo
- ... **LLT** Other peripheral vertigo
- ... **LLT** Peripheral vertigo, unspecified
- ... **LLT** Room going round
- ... **LLT** Rotatory vertigo
- ... **LLT** Spinning

Report 1: "My head felt like it was revolving on an axis"

Report 3: "Felt like the room was going around"

Report 2: Patient diagnosed with rotary vertigo

Improving adverse event reporting

State of Adverse Event Reporting

- Publications describe high levels of under-reported adverse events
 - 95% of all AEs and 80% of serious AEs are under-reported¹
 - Hospital staff did not report 86% of events to incident reporting systems²
- This leaves a large percentage of data to be collected

Sources: 1 – Hazell L, Shakir S. Under-Reporting of Adverse Drug Reactions - A Systematic Review. Drug Safety. 2006.
2 – Levinson D. Hospital incident reporting systems do not capture most patient harm. OEI-06-09-00091. 2012

Collecting More Data

- In response to the known under-reporting of AEs, regulators and industry are under pressure to be more proactive to find alternative sources
 - Mining electronic health records
 - Mining claims data
 - Social media sources
 - Direct patient reporting via mobile apps and web portals

The screenshot shows the WEB-RADR website with a teal header containing navigation links: About Us, Goals, Work Packages, Partners, Governance, and Press & White Papers. The main content area is divided into three sections:

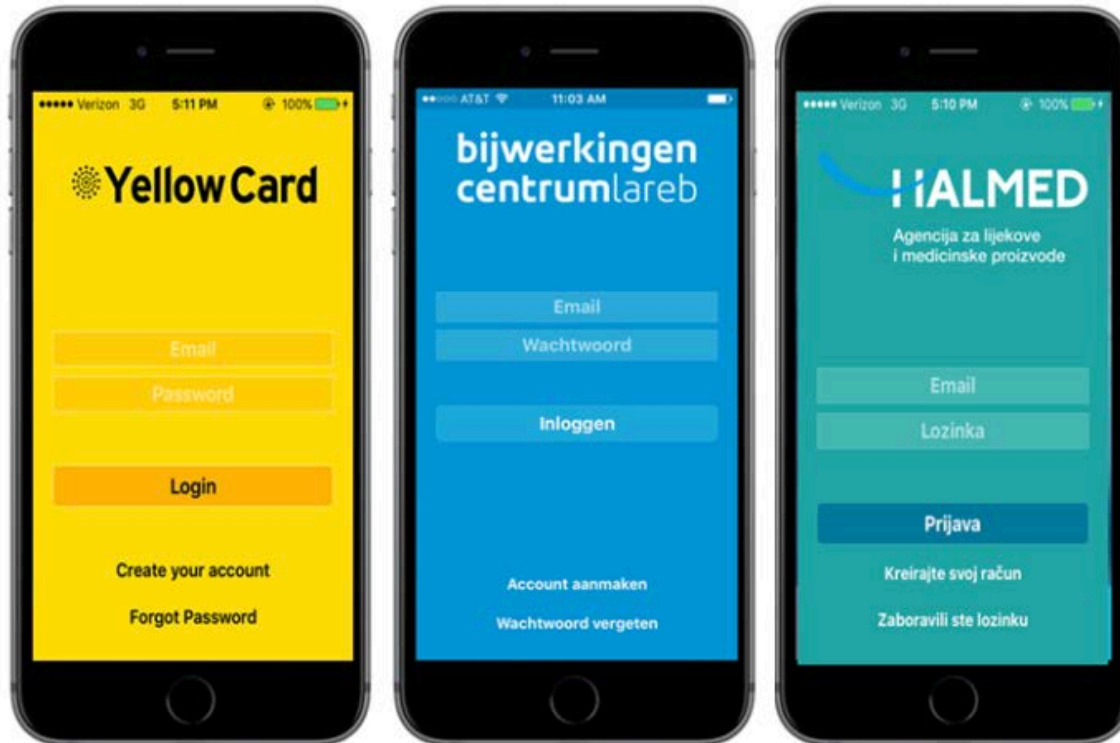

- PARTNERS:** A grid of logos for various organizations including Novartis, MHRA, epidemico, EURORDIS, University Medical Center Groningen, University of Liverpool, SRDC, UCL, HALMED, Lareb, European Medicines Agency, Uppsala Monitoring Centre, Janssen, Bayer, AstraZeneca, Sanofi, UCB, Amgen, GSK, and MedDRA.
- NEWS:** A list of recent news items with dates:
 - WP3B Poster: Barriers and facilitators for a mobile app to report Adverse Drug Reactions & receive information about drugs (14 October 2015)
 - Social Media and Pharmacovigilance, British Journal of Clinical Pharmacology Publication (5 October 2015)
 - Innovative Medicines Initiative WEB-RADR Workshop Report (30 September 2015)
 - WEB-RADR Yellow Card app launch 14th July 2015 (23 July 2015)
 - First Innovative Medicines Initiative WEB-RADR Workshop: mobile technologies and social media as new tools in pharmacovigilance (5 January 2015)
- QUESTIONS OR COMMENTS?:** A section with the text: "Please send us questions or comments via our [feedback form](#)".

- WEB Recognising Adverse Drug Reactions
- EU consortium under Innovative Medicines Initiative
- Three year project (Sep 2014-2017)
- Developing mobile apps for ADR reporting
- Investigating use of social media to identify drug safety issues

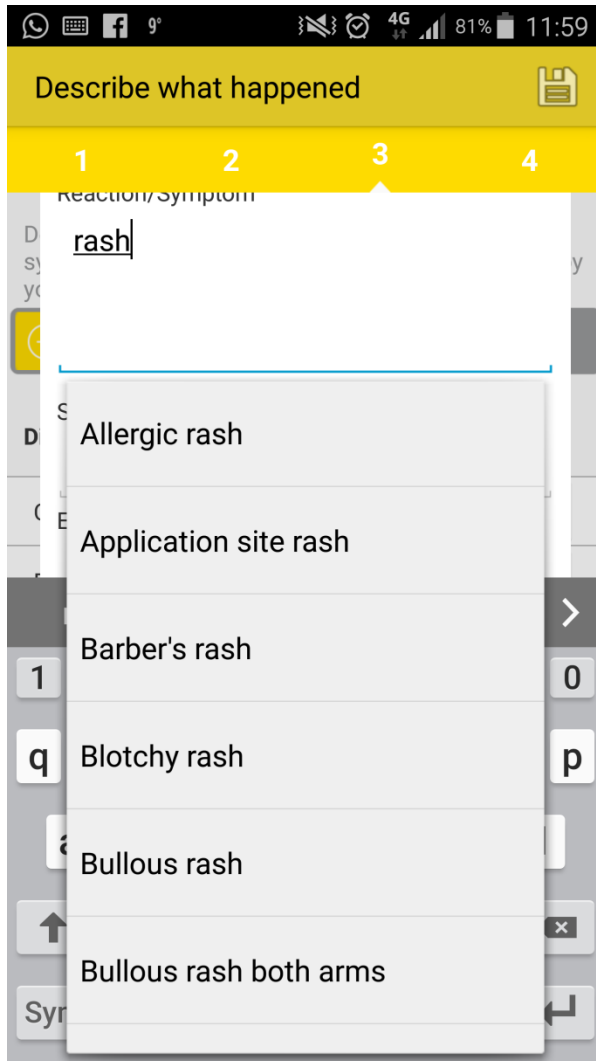

MedDRA

Mobile Apps

- Report adverse drug reactions
- Receive information and news alerts
- Patients, caregivers, healthcare professionals

Yellow Card App

- MedDRA PTs/LLTs embedded
- Free text option
- Good specificity for analysis
- MedDRA can present challenges
 - >200 “rash” terms
 - Granularity may overwhelm users

MedDRA

Patient Friendly Terms

- Developing a set of MedDRA terms that are “patient friendly” to support patient reporting through mobile apps and web portals
- Start with patient-reported data provided by WEB-RADR partners

Patient Friendly Terms (cont)

- Medical review of data to identify terms frequently used and commonly understood
 - Signs and symptoms
 - Natural word order
 - US and UK English spellings
- Goal is ~2-3,000 patient friendly terms out of >70K MedDRA terms
- Testing of initial list in 2017
 - In Yellow Card app
 - Feedback from patient groups

MedDRA supports global public health and positively impacts patient safety by providing:

- Support for safety monitoring of medicinal products
 - Facilitates the collection of data for analysis of potential safety signals
 - An international standard used by regulatory authorities, biopharmaceutical industry and others
 - Support for improving adverse event reporting
