

Data Analysis and Query Building with MedDRA

Objective:

To provide MedDRA users with a basic understanding and information on the use of MedDRA for data analysis and query building.

Description:

This 1-hour webinar introduces the MedDRA Data Retrieval and Presentation: Points to Consider document, and describes the application of MedDRA in data retrieval, presentation, and analysis. The course concludes with a discussion of the use of MedDRA to build data analysis queries.

This course is designed for:

MedDRA users, particularly clinical research and pharmacovigilance personnel, as well as others interested in the use of MedDRA for data analysis and query building. This presentation is not intended to provide a comprehensive overview of MedDRA data analysis and query building -- for individuals wishing to acquire in-depth knowledge of these subjects, please follow this course with the Standardised MedDRA Queries (SMQs) webinar or consider attendance at the face-to-face MedDRA: Safety Data Analysis and SMQs course.

Course outline:

- Discuss topics in the MedDRA Data Retrieval and Presentation: Points to Consider document
- Discuss applications of MedDRA in data retrieval, presentation and analysis
- Discuss and demonstrate the use of MedDRA for developing queries
- Conclude with a question and answer session
- Appendix -- MedDRA's scope, structure, and characteristics
