

Advanced MedDRA Coding

Objective:

To challenge users who have basic MedDRA coding experience with a presentation of advanced coding principles and examples. If you have no experience with coding with MedDRA, it is highly recommended that you first complete the MedDRA Coding Basics webinar.

Description:

This 1-hour webinar introduces advanced topics from the MedDRA Term Selection: Points to Consider document, demonstrates additional features of a MedDRA browser, presents advanced MedDRA coding examples, and provides attendees with “pearls” to assist their coding efforts.

This course is designed for:

Users with basic MedDRA coding experience who wish to advance their knowledge of MedDRA coding principles and practices. This presentation is not intended to provide a comprehensive overview of MedDRA coding – for individuals wishing to acquire in-depth knowledge of this subject, please consider attendance at the face-to-face Coding with MedDRA course.

Course outline:

- Discuss important principles in the MedDRA Term Selection: Points to Consider document
- Demonstrate some features of a MedDRA browser
- Discuss coding examples using a MedDRA browser
- Present some MedDRA coding “pearls”
- Conclude with a question and answer session
- Appendix – MedDRA’s scope, structure, and characteristics/Browsers
